

## **Privacy Statement**

The names and email addresses entered in this journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party.

## **Ethics Statement**

Statement on ethics and publication malpractice, adapted from the Committee on Public Ethics (COPE)

## **Fair play and Editorial Independence**

The editors of the Southeast Asian Journal of STEM Education evaluate submitted manuscripts on the basis of their academic merit and its relevance to the journal's scope, without regard to the authors' race, gender, sexual orientation, ethnic origin, citizenship, religious belief, political philosophy or institutional affiliation. Decisions to edit and publish are not determined by the policies of governments or any other agencies outside of the journal itself. The Editor-in-Chief has full authority over the entire editorial content of the journal and the timing of publication of that content.

## **Confidentiality**

Editors and editorial staff will not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.

## **Disclosure and Conflicts of Interest**

Editors and editorial board members will not use unpublished information disclosed in a submitted manuscript for their own research purposes without the authors' explicit written consent. Privileged information or ideas obtained by editors as a result of handling the manuscript will be kept confidential and not used for their personal advantage. If editors have conflicts of interest resulting from competitive, collaborative, or other relationships/connections with any of the authors, companies or institutions connected to the papers, they will ask another member of the editorial board to handle the manuscript.

## **Publication Decisions**

The editors ensure that all submitted manuscripts being considered for publication undergo a double-blind peer-review by reviewers who are experts in the STEM fields. The Editor-in-Chief is responsible for deciding which of the manuscripts submitted to the journal will be published, based on the validation of the work in question, its importance to researchers and readers, the reviewers' comments, and such legal requirements as are currently in force regarding libel, copyright infringement and plagiarism. The Editor-in-Chief may confer with Associate Editors or reviewers in making this decision.

## **Involvement and Cooperation in Investigations**

The Editor-in-Chief (in conjunction with the publisher and/or Associate Editors) will take responsive measures when ethical concerns are raised with regard to a submitted manuscript

or published paper. Every reported act of unethical publishing behavior will be investigated, even if it is discovered years after publication. If, on investigation, the ethical concern is well-founded, a correction, retraction, expression of concern or another note as may be relevant, will be published in the journal.

### **Suspected Plagiarism**

The editor will often investigate instances of suspected plagiarism using online plagiarism checkers and will communicate with the author(s) to receive a response and if the suspicion is well-founded, the manuscript will be rejected.
